

# HEBEI SLN SLING GROUP CO.,LTD

ISO 9001/CE/GS/SGS/CCS/ABS/DNV

**Tel: +0086-22-66205566**

**Fax: +0086-22-66205666**

**Email: [sales@slings.cn](mailto:sales@slings.cn)**

**Cell Phone: +86 186 022 63666**

**Website: [www.slings.cn](http://www.slings.cn) [www.silien.cn](http://www.silien.cn)**

**Factory Add.:**

**Dawangdian Industrial Park, Baoding City, Hebei Province, P.R.C.**

**Meet customer's demand to the greatest degree.**

## Our latest introduction of

# Flemish S505

## steel pressure sleeve

- 1, There is no leakage of steel wire ends, not to hurt the hand.
- 2, The unique design of the steel sleeve, blue hanging from one end to extract the rope more smoothly.
- 3, Improve the efficiency of the conclusion, to meet the safe use of the guarantee, the choice of smaller diameter wire rope, for the user to save money, make the operation more portable.
- 4, Rigging identification plate to tell the operator correct and reasonable use of rigging.
- 5, Low temperature can be used.

## Pressed Wire Rope Sling

The Pressed Wire Rope Sling has a selection for the world's top quality wire rope and is manufactured with the most professional equipments and technics .It's a kind of safe and practical lifting tool for lifting,shifting,handing heavy loads.It possesses advantages like high -temperature resistance,anti-wear,easy-use and high working load capacity and is Widely used in the field of machinery, metallurgy, construction, shipping, bridge project, gymnasium, oil field, fishing, drilling, colliery and ports etc...

The Range of pressed Wire Rope Sling is  $\Phi 6\text{mm}-\Phi 190\text{mm}$ . And we also can make the special standard pressed sling according with the requirements from the customers.

## Spliced wire rope sling

The Spliced Wire Rope Sling has a selection for the world's top quality wire rope and is manufactured with the most professional equipments and technics .It's a kind of safe and practical lifting tool for lifting,shifting,handing heavy loads.It possesses advantages like high -temperature resistance,anti-wear,easy-use and high working load capacity and is Widely used in the field of machinery, metallurgy, construction, shipping, bridge project, gymnasium, oil field, fishing, drilling, colliery and ports etc...

The Range of Spliced Wire Rope Sling is  $\Phi 6\text{mm}-\Phi 500\text{mm}$ . And we also can make the special standard pressed sling according with the requirements from the customers.

## 4-leg wire rope sling

This form with the working load use the steel wire rope: 6X37+FC-1670、 8X61+FC-1670;

The 0-45 can be used if the customers do not have any special requirement.

Different construction of the rope means different working load,we can calculate the working load with the wire rope construction that the customer required.

According to the GB/T16271-1996 Standard

## Closed casting wire rope sling

According to the GB/T8918-1996 or JB/T5225-93Standard

Rope centre is hemo center; it is usually galvanizing but oil-free steel wirerope. It is should be informed ifthe above regulations are changed.

By molding stiffness of steel wirerope sling and modulus of elasticity, its consolidation rate is high and it is usually used to situation of bearing net tension.

## Endless wire rope sling

The specail features of endless wire rope sling is soft rope body, many lifting points,can solve the hoisting of the space is little ,high load requirements,can be applied to transformer, shipbuilding and special machinery,and otherconditions of the special requiemet of heavy lifting.(endless wire rope sling warning labels parts it is forbidden to dolifting point)
